

One-stop-shop website

Leading occupational health and safety (OHS) training provider, Action Training Academy (ATA), launched its newly-developed interactive website, which aims to provide users with current information on ATA's emergency medical/paramedic and health and safety courses, services, products and equipment.

ACTION TRAINING ACADEMY managing director Alastair Farish says that the website serves as an up to date health and safety and emergency management service platform. "ATA recognises that access to timely, quality information is becoming more important for today's consumer. This launch is the birth of ATA's customised online presence," says Farish.

A range of occupational health and safety courses, services and products can be booked/bought via the website's all encompassing paramedic, first aid, OHS, firefighting and emergency online 'one-stop shop', as well as the website's customisable training booking forms. ■

Since its establishment in KwaZulu-Natal in 2001, Action Training Academy has experienced tremendous growth and now operates as a national training operation, with branches in Gauteng, KwaZulu-Natal, Western Cape and Eastern Cape. The growth of the business can be attributed to the dedicated management team, professional facilitators, fair pricing and quality-focused customer care.
